

Success Made Simple

The Solution

TMA Systems is a leading provider of Computerized Maintenance Management Systems (CMMS) for federal, state, and local entities. These solutions automate and streamline maintenance operations to provide cost-effective methods that ensure reliability and increase productivity. At TMA, we understand that your success is directly related to your ability to effectively maintain your organization's assets. And at TMA, we make your success simple.

TMA's twenty years of experience has built a deep understanding of the challenges and complexities facing organizations like yours. These are institutions that pursue a high level of performance within their maintenance operations. TMA takes this understanding, coupled with listening to clients' needs and delivers solutions that provide the highest possible value.

Worldwide, more than 1,300 TMA clients maintain in excess of 37,000 facilities, representing 2.5 billion square feet of space. These world-class organizations have a deep appreciation of the complexity and challenges of managing facilities. Their bottom-line focus is on their assets, the services they perform, and the contributions they make in meeting the goals and objectives of their organizations.

In today's competitive environment, you need the most effective and efficient tools available to manage your facility. TMA helps you do this by providing the information necessary to operate and manage your maintenance organization with knowledge, insight, and confidence. These solutions give you the ability to make more informed decisions based on clear and accurate data.

The Value Proposition

- A leading software provider to the public sector
- World-class products
- Exceptional service
- A partner committed to your success

TMA has always been recognized as a leading solution provider for federal, state, and local entities. Along with our demonstrated record of providing intuitive, easy-to-operate software, TMA has a strong reputation of exceptional service. This service is the hallmark of our success and permits us to maintain one of the highest client retention rates in the industry.

As a TMA client, you will instantly gain the power to extend the useful life of your assets, analyze and plan for the future, and make your organization even more efficient and effective. Most importantly, you will do this with a committed partner... a partner committed to your success... a partner that will provide you with superior software solutions, world-class implementation, training, consulting, and support services.

Products

Whether your organization requires a desktop solution or a web-based solution, TMA will meet your needs. With the flexibility to start small and add to your software, our scalable product set and optional modules will grow with your organization's needs, requirements, and demands. We are proud that our solutions offer the ease-of-use for beginners yet are robust enough to satisfy the most demanding facility professional.

eXpress

A robust yet reasonably priced maintenance management software solution that will provide your organization with the necessary tools to effectively account for and maintain your facility's assets.

WorkGroup

A powerful maintenance management software solution that has the ability to meet the needs of organizations that want to effectively maintain their facility's assets. WorkGroup provides you with advanced features and functionality such as multiple repair/cost centers, project management, and advanced materials management.

Enterprise

The ultimate maintenance management software solution that features an open architecture for superior interoperability. This powerful solution provides all the necessary tools to effectively maintain your facility's assets, plus additional functionality such as advanced accounting, materials management, and contract management.

WebTMA

This scalable, web-based, maintenance management software solution provides you with the ability to access your organization's information via any standard web browser from any location at any time. Whether your organization desires to use WebTMA as an ASP solution or as a hosted solution, you will have the features and functionality necessary to maintain your facility's assets.
